

## Group Policy Management Console Scripts - GPMCS

Die schon bereits seit Server 2003 beliebten Scripte müssen seit Server 2008 nachinstalliert werden.

### Das Thema heute: Gruppenrichtlinien – backup & restore

Wir öffnen die Commandline und führen zum sichern aller GPOs folgende Befehl aus:

```
cscript.exe "C:\Program Files (x86)\Microsoft Group Policy\GPMC Sample Scripts\backupAllGPOs.wsf" C:\Temp /comment:"Joerns Backup"
```

```
Administrator: Windows PowerShell
C:\Users\Administrator>cscript.exe "C:\Program Files (x86)\Microsoft Group Policy\GPMC Sample Scripts\backupAllGPOs.wsf"
C:\Temp /comment:"Joerns Backup"

== Found 2 GPOs in NDSEDU.DE to backup ==

Backed up GPO 'Default Domain Policy' with the following properties:

GPO ID:          <31B2F340-016D-11D2-945F-00C04FB984F9>
Timestamp:      30.10.2014 22:12:25
Backup ID:      <A028222E-50E4-4E93-A91E-20DD8B0A89AD>

Backed up GPO 'Default Domain Controllers Policy' with the following properties:

GPO ID:          <6AC1786C-016F-11D2-945F-00C04FB984F9>
Timestamp:      30.10.2014 22:12:29
Backup ID:      <BEC1B55A-6A26-4828-AB4E-0C8B4771B8E7>

Backup succeeded for 2 GPOs.
Backup failed for 0 GPOs.

C:\Users\Administrator>
```

Um das Backup wieder einzuspielen führen wir diesen Befehl aus:

```
cscript.exe "C:\Program Files (x86)\Microsoft Group Policy\GPMC Sample Scripts\restoreAllGPOs.wsf" C:\Temp
```

```
Administrator: Windows PowerShell
C:\Users\Administrator>cscript.exe "C:\Program Files (x86)\Microsoft Group Policy\GPMC Sample Scripts\restoreAllGPOs.wsf"
C:\Temp
